

MAIN provides users with advance notice of production software changes. Although our goal is to make the software changes on the planned date, there may be some circumstances due to unforeseen problems, where the software changes may be delayed. If this occurs, the MAIN Help Desk will be notified and the Help Desk message will be updated accordingly.

The following software changes will be in production on May 2, 1996.

NOTEPAD F11-SAVE FUNCTION KEY DEACTIVATED

The F11-Save function key on the notepad caused a loop in the program. To correct the problem, the F11-Save functionality was removed. If the F11-Save function key is used, the error message Z12 'Invalid Action' will now be displayed. The F10-Save function key should be used to save text on the notepad.

RMDS REPORTS AVAILABLE EARLIER

Several performance improvements were made to the Batch Process and Reporting Cycle. Reports should be available in RMDS a few hours earlier.
